

NEW!

Sound Damper SS2-1.0-T1

Sound damper suppresses airborne and vibration sound simultaneously

- Simply by applying damper sheet to surface it reduces sound emission from vibration
- Acrylic rubber (KGS formula) gives high sound insulation effect
- Custom die cut upon request
- Operating temperature: -40 °C ~ +150 °C
- Applications: noise control of motors, fans, relays, inverters, etc

Specifications

Property	SS2	
Gravity	3.5	
Tensile Strength (MPa)	4.4	
Elongation (%)	34	
Sound Insulation Rate (dB)	500Hz	22
	2,000Hz	29
	10,000Hz	46
Loss Factor (tanδ)	-40°C	0.009
	20°C	0.053
	150°C	0.007
Volume Resistivity (Ω • cm)	1 X 10 ¹¹	
Thermal Conductivity (W/m • K)	1.1	
90° Peel Adhesion (N/10mm)	6.9	
High Temperature Test 150°C x 1000hr	Gravity	3.5
	Tensile Strength (MPa)	4.1
	Elongation (%)	14
Flame Resistance (UL94)	HB Equivalent	
Operating Temperature (°C)	-40 ~ 150	

All statements, specifications, properties, technical information, and recommendations herein are based on tests; however, the accuracy and completeness are not guaranteed and are subject to change without notice due to product improvement and specification change. This statement is made in lieu of all warranties, expressed or implied, including the implied warranties of marketability, and fitness for purpose. KITAGAWA INDUSTRIES America, Inc. obligation under this warranty shall be limited to replacement of product that proves to be defective. Prior to use, the user shall determine the suitability of the product for its intended use, and the user assumes all risk and liability whatsoever in connection therewith. KITAGAWA INDUSTRIES America, Inc. shall have no liability for any injury, loss, or damage arising out of the use of or the inability to use the products. No statement or recommendation contained herein shall have any force or effect unless in an agreement signed by officers of seller and manufacturer.

Please request for detailed product specification data prior to purchase

Volume resistivity stated on our EMI absorber flyer is meant for noise control parameters, where the absorber is considered a conductor, but not for insulation performance. Care should be taken when using absorbers. KITAGAWA INDUSTRIES America, Inc. makes no guarantees as to electrical resistivity values and accepts no liability due to short circuits where EMI absorbers are used directly on a PC Board or areas near high voltage such as for power. The products are designed for EMI noise reduction for electronics. This is not recommended for applications involving human life or extremely high accuracy. Prior to using the products in production, please verify their performance or adhesive strength of PSA for long term use. Avoid applying any external stress such as bending or high amounts of tension. Note when the absorber products are cut, bent, or pulled, there may be a possibility of creating cracks. For storage, keep products in a cool, dry, well-ventilated area at room temperature and avoid high temperatures, humidity, and direct sunlight.

Please contact the sales department at KITAGAWA INDUSTRIES America, Inc. for the use of our products prior to selecting the parts for your application.
